

Nikola.ai
The dawn of
health

Chat your worries and stresses off
With Nikola AI, an interactive AI Chatbot.

About

The AI Therapist is designed for people suffering with mental health disorders like clinical depression, stress, anxiety, etc. These Mental Health disorders account to about 3% of total deaths per year in India and is increasing at a staggering rate lately. The open-source AI Therapist is designed in a way that people can encounter a friendly interaction with Artificial Intelligence.

A friendly interface and light use of language and grammar catalyses our purpose.

Project submission by team CF-13

ABOUT TEAM CF-13

The team of CF-13 for HackCom comprises of three passionate and enthusiastic students namely Arth Tyagi, Pranav Dhawan, and Siddharth Nikhil. In accordance with the topic given, the team aims at using the full width of their respective skill set and the time given to present more than one, two products. The first product is an interactive Artificial Intelligence chatbot which helps individuals going through problems such as social anxiety, nervousness, narcissism, depression, etc. The very friendly and light nature of NIKOLA AI CHATBOT can be used to talk a person out of believing false or foul things.
